**Parameter**

Bezeichnung	Wert
Hebehöhe	3570 mm
Gewicht	562 kg
Tragfähigkeit	1600 Kg
min. PS	60-120 hp
Geschwindigkeit	8 KM/H

Beschreibung

Metal-Technik front loaders have been built to guarantee the highest efficiency. Starting from the general mobility down to the smallest detail. As a manufacturer of front loaders, we used the highest quality steel - S355, two pipe crossbars with a diameter of 90 mm, which strengthen the structure, and a cylinder with a reduced diameter - which perfectly harmonizes with tractors with poor hydraulic efficiency. The paint coating consists of a primer and the actual paint, which is applied using the powder method. The front loader is controlled by a joystick. It is equipped with, among others in: quick coupler for mounting the loader, quick coupler for complete hydraulics, mechanical parallel guidance and supports for putting the loader down. Front loaders work with, among others, such accessories as: grapple, crocodile, bucket, crocodile bucket, pallet truck, cutter. They are intended for loading and unloading crops, manure, silage of loose materials, pallets and transport works on a farm. As a recognized manufacturer, we offer a professional front loader, the price and quality of which will meet all your expectations. The standard joystick and splitter from renowned manufacturers.
